<https://www.linkedin.com/in/ferpm15/>

Frontend Developer with 2+ years of experience developing and testing multiple web-based applications, incorporating a range of technologies like JavaScript, React, Next and CSS3.

I am looking for new challenges to grow professionally as a Frontend Developer with React and Next.js.

EXPERIENCE

AGEA/Grupo Clarín, Frontend Developer 100% remote — November, 2020 - Present

I developed and tested template components for different sections, note details, headers, navigation sliders, search engines and more, to achieve the motorization of:

- **October 2022** | The most important Spanish-speaking sports news site: <https://www.ole.com.ar/>
- **March 2022** | The most important news site in the province of Santa Fé, Argentina: <https://www.ellitoral.com/>
- **December 2021** | The site <https://elle.clarin.com/>

I participated in these motorization processes so that the newsrooms did not require a team of programmers to update their sites all the time, reducing development costs by 80%, in addition to improving performance by 30% on average, using technologies such as Next, allowing SSR or CSR in a selective manner among other advantages.

- **Tech Stack** | React, Next.js, Node, Javascript, CSS3, HTML5.

SKILLS

Programming Languages: Advanced: Javascript, CSS3, HTML; Intermediate: SQL, Java; Básic: Bash.

Frameworks Tools: Advanced: React; Intermediate: Next, TailwindCSS, SASS; Básic: Node.

Data Base: Intermediate: MySQL.

Tools: Git, Bitbucket, Github, Jira, Confluence, Slack.

Agile: Scrum, Design Thinking.

Languages: Intermediate: English; Native: Spanish.

EDUCATION

Digital House – Buenos Aires, Argentina. Certified Tech Developer, present.
